

# Maintenance instructions

## ► TA'OR BOX

Congratulations on the purchase of your TA'OR BOX!

With these short maintenance instructions we can guarantee you will enjoy your TA'OR BOX for years to come.

Please note that due to lighting conditions and usage the appearance of the drawer may change.

At TA'OR we strive to offer our customers the highest possible quality. This is guaranteed by continuously monitoring the production process and regularly carrying out quality control.

- Clean the drawer using a lint-free and soft cloth or sponge, dampened in lukewarm water. If possible, mix the water with a small quantity of a pH neutral cleaning agent.
- Always clean veneer drawers in the direction of the grain of the wood.
- Thoroughly clean the most dusty parts, to prevent the dust from ageing the veneer.
- After cleaning, dry the surface using a dry cloth.
- Ensure that there are no traces of water or other liquids.

- Do not use any sprays, detergents, silicon or abrasive cleansing agents, as they can affect the shine and finish of the surface.
- Do not use sandpaper, steel wool or other abrasive agents.

- Stains with high amounts of colouring (such as coffee, tea, red wine, ...) will leave a slight discolouration once dried.
- Place the furniture with the drawer(s) in a stable climate.
- Please note that stains from products containing alcohol (nail polish, ...) are difficult to remove.
